Election/Restrictions

DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 11-31, drawn to Method of preparing a doped semiconductor powder, classified in class 438, subclass 510.

II. Claims 1-10, 32-37, drawn to A doped semiconductor powder, classified in class 257, subclass 607.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the Group I invention does not necessarily imply unpatentability of the Group II invention, since the device of the Group II invention could be made by processes materially different than that of the Group I invention, for example, the doped semiconductor material could be prepared by ion implantation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
